

AGNITION  
KNOWING YOUR BUSINESS

## Context

The client is a large organisation in the public sector. This client required project management training and also a way to evaluate and plan projects in a fast, efficient method that would save on time, money, and other essential resources. Agnition were hired to provide a course in its **EPICWay® to Manage Projects** and also to conduct a **Project Fastrack** with the client.

## Project Details

**Duration**      **Project Management Training** and **Project Fastrack**

**Objectives**      Agnition was engaged to train workshop participants in project management. Along with this Agnition was to carry out a **Project Fastrack** session on a major project producing a completed **Project Brief** and a **Project Charter**.

**Deliverables**      The **EPICWay® to Manage Projects** programme combines both theory and practical work. Participants are trained in how to manage projects by using the right project tools.

Participants also bring with them a project that is relevant to the work that they are doing and at the end of the programme have a completed Charter that they can use to implement a project successfully.

A **Project Fastrack** involves meeting the client and spending 1 day completing the Evaluation and Planning of the project.

At the end of a **Project Fastrack** the client had a completed **Project Charter** concentrating on the most important aspects of any project – objectives and scope, milestones and deliverable, risk management, change control.
