

The Project and People Company

Make the Workplace Work

EPICWay[©] Practitioner

“Great content. Great use of examples from past experiences. Extremely valuable training course. Very good understanding of project management obtained. Will be reflected in projects.”

Frank Phelan, MFG/Pro Co-ordinator, Genzyme

Because Agnition believes that a manager needs to be able to manage both projects and people we are building a network of qualified professionals in the fields of Project and People management

The EPICWay[©] Practitioner is part of a series of Project Management Qualifications leading to Professional and Master levels. At each level we transfer tools, processes and skills necessary to reach the qualification.

Agnition has trained over 800 Practitioners since 2006.

The EPICWay[©] Practitioner is a work-based, highly interactive programme in Project Management accredited at FETAC Level 6. The programme takes place over one week with a self-study element in between.

Project Management is not complex but it is comprehensive. Using a live project which you bring to the workshop, the EPICWay[©] model will activate your project by putting it through the Evaluate, Plan, Implement, Complete cycle.

Along the way you will be given the practical experience of the tools, processes and skills necessary to become an effective practitioner.

Come to this two-day Workshop and become an EPICWay[©] Practitioner!

Of 100 participants surveyed:

- 65% feel that they can now confidently assess risks
- 56% of participants will now review a project once it has been completed
- 50% will now focus on the importance of good communication
- 47% will involve all relevant stakeholders in the project
- 41% learned how to focus more on planning a project
- 69% said it was one of the best courses they had ever been on
